Daniel Martin
Front End Developer

Education

Rochester Institute of Technology
BS New Media Interactive Development
Magna cum laude (GPA 3.62)
Dean's List Spring 2014 - Fall 2017

Experience

Front End Developer, Coll-U
February 2019 - June 2019

Coll-U is a start up working in software development. My duties as the front end developer included:
- Working with a designer on the UI/UX design of a web/mobile app
- Creating user flows and mockups
- Devloping the front end of an Angular app

WordPress Developer, African Heritage food Co-op
July 2018 - December 2018

AHFC is a Buffalo based non-profit which works in community development. My responsibilities included:
- Working with a designer on custom theme designs
- Developing a custom theme/plugin for a community homepage
- Developing custom functions for WooCommerce

iOS Developer, NIH and RIT
September 2017 - December 2017

Interned with the Rochester Institute of Technology on an NIH grant project. My responsibilities included:
- Designing an app with users who have never used a tablet in mind
- Developing an iOS app which detected irregular heart rhythms using a front facing camera
- Developing a Firebase database to store camera data
- Presenting app updates and functions to a health board at the University of Rochester for review
